

 **BabyGuard** *Developed for babies*

WOULD YOU LIKE TO PROTECT YOUR CHILDREN FROM THE HARMFUL EFFECTS OF THE SUN? WOULD YOU AVOID THEM BEING BOTHERED BY TOO MUCH SUNSHINE? SKYFOL BABYGUARD IS THE PERFECT CHOICE FOR THE FAMILY.

Pleasant sunshine can easily turn troublesome while travelling, especially for young children – they cannot sleep, they are hot and become irritable; the journey can soon turn into a nightmare. The Skyfol BabyGuard

window film offers a perfect solution and provides a comfortable journey for young ones with its extremely strong heat protection.

### Professional heat protection

The BabyGuard series, which is produced using nano-technology, provides superior heat protection and eliminates the heat that gets into the car.

### Aesthetic appearance

No more flitting pieces of cloth and sunshades. Would you use these ugly means on your car if there is a beautiful, aesthetic and professional solution to your problems? Of course not.

### Only available from Skyfol

Skyfol BabyGuard is produced exclusively for Skyfol by one of the leading manufacturers in the world, using the most developed technology to provide one of the strongest heat protection performances available in the industry

### Up to 95% privacy control

Are you blinded by sunshine and cannot see the screen of tablets? Make travelling comfortable on the back seat while providing clear vision at the same time.

### 99.9% UV filtering

The series has a unique UV protection of 99.9%, as it utilizes the UV filtering materials of so-called „museum flms“, used for the protection of valuable objects from fading.

# WHY SHOULD I GET A WINDOW FILM IF MY CAR WINDOWS ARE DYED OR I HAVE A FACTORY-BUILT SUNSHADE?

The table below demonstrates why window films are the most efficient shading solution on car windows.

	BabyGuard	Dyed window	Sunshade
<b>Heat protection</b>	Outstanding heat protection thanks to its structure made with nano-technology, for the ultimate protection of babies with no heat in the car	Factory-tinted windows filter visible light, but they do not filter the infrared range	Limited filtering of visible light and infrared radiation
<b>Visibility</b>	Crystal clear, little ones will have perfect visibility	Crystal clear	Limited visibility, but it can be drawn
<b>Light protection</b>	5% light transmission especially for babies, 15% for parents for the rear windshield for optimal visibility	20% light transmission for the parents, which is not enough for babies	Available in one version, generally with a 30-40% hole-structure
<b>UV protection</b>	99,9% UV protection to protect babies' eyes	Because of their dark character, your pupils dilate. The level of UV protection is usually only around 40%	Because of their dark character, your pupils dilate. The level of UV protection is usually only around 40%
<b>Security</b>	In case of breaking, chips of glass are held together by the film	In case of breaking, chips of glass are dangerous for passengers	In case of breaking, they provide partial protection against glass chips, which however get into the car

The BabyGuard film filters radiation which enters through the car windows and decreases the travelling comfort of little ones

## UV radiation

Harmful children's skin, in extreme cases it can cause unwanted mutations of the skin.

The BabyGuard series has increased UV protection thanks to its absorbent particles in its structure.

## Visible light

Too much visible light has a blurring effect. It gets reflected from screens, therefore strains the eye. 47% of energy comes from this range.

Thanks to its carbon-based pigments and patented dying technology, the BabyGuard series is the top of the industry today.

## Infrared radiation

Creates an unwanted burning sensation on children's skin. It is one of the most important ranges from the aspect of heat sensation. 53% of energy comes from this range.

The BabyGuard series contains IR inhibitors which strongly filter infrared radiation.

## Technical details

	BABYGUARD 05	BABYGUARD 15	BABYGUARD 30	BABYGUARD 50	BABYGUARD 70
Total solar energy transmitted	5%	9%	16%	23%	35%
Total solar energy rejected	70%	67%	62%	57%	49%
Visible light transmission	5%	14%	30%	50%	67%
Visible light reflection	6%	6%	6%	8%	9%
UV filtering	99,9%	99,9%	99,9%	99,9%	99,9%
Warranty	Limited Lifetime*
